1	Course Name:	Project I														
	Course Code:	BMCS3404														
	Course Classification:	Major (core)														
2	Synopsis:	This course will provide opportunity to the students to apply knowledge and skills they have learnt to investigate, analyze, and design a system based on a research topic or real-life scenario. The students will use appropriate technologies, such as database, Web technology, networking technology, etc. to design the proposed system. Besides, this course also allows students to gain project management skills so that they are able to deliver the system within a given time frame.
