

BMIS2113 Information Technology Infrastructure

Assignment (Jun 2026 Semester)

Objective

This assignment is a partial fulfilment of requirements for the course BMIS2113 Information Technology Infrastructure leading to respective Bachelor Degree qualification. This assignment aims to provide students with an opportunity to look into the practical dimensions of the course. This assignment will help students to understand and appreciate the modern IT systems and networks to design, implement, and maintain IT infrastructure solutions that support business operations and ensure data security. Integration of knowledge across the topics in the course is expected in this assignment.

Learning Outcomes

The learning outcome being assessed in this assignment is:

CLO3: Design the IT infrastructure and IT server architecture options for an organisation. (C4, PLO2)

Assessment

This assignment contributes 80% to the total Continuous Assessment (CA) component (100%) of the course. The breakdown of marks is shown in the Assessment Rubric (refer to Assessment Rubrics for details.)

Assignment Schedule

Assignment report submission date:

- Progress report: Bi-weekly
- Final submission: 2nd September 2026, Tuesday of Week 12, before 12 noon (softcopy)

Late Policy

The University requires all students to submit assessed coursework by the deadline as stipulated unless the student is granted an extension or special consideration due to Extenuating Mitigating Circumstances (EMC). In cases where there are no accepted EMC, late submission of coursework shall lead to the imposition of penalty. With the exception of EMC reasons, penalty for late submission of coursework shall be imposed after submission deadline / extended submission deadline:

- Late submission within 1 - 3 days: total marks to be deducted is 10 marks.
- Late submission within 4 - 7 days: total marks to be deducted is 20 marks.
- Late submission after 7 days: reject coursework and zero mark shall be awarded

Note:

1. For EMC (Extenuating Mitigating Circumstance) cases, students need to apply for the Leave of Application from the FOCS office as a record where proof of MCs, Death Certificate, SPM Examination, MUET Examination, etc. is given.
2. For any late submission of assessment, students shall complete the Late Submission of Assessment Form (as attached) and attach it together with their assessment. The lecturer/tutor shall also acknowledge that in the form.

BMIS2113 Information Technology Infrastructure

Policies or/and guideline (as of intranet):

- Guidelines on Late Submission of Assessment

Academic Integrity

Tunku Abdul Rahman University of Management and Technology views academic integrity and honesty as an utmost important quality to inculcate in the University's community. The University regards all forms of academic dishonesty as serious offences and are reviewed on a case-by-case basis. Any academic dishonesty will be subjected to disciplinary actions by the University and the assignment mark will be downgraded to zero mark.

Policies or/and guideline (as of intranet):

- Free-Rider Policy
- Free-Rider Guideline (Students)
- Student Plagiarism Policy

Group Formation

Form a group of **THREE (3) - FOUR (4)** students to complete this assignment.

Feedback

Final feedback on the assignment will be returned to the students latest by week 14, by the tutor in-charge.

The Submission

In submitting the assignment report, you must strictly comply with the following requirements.

Media	This assignment should be submitted in <u>softcopy</u> . ● Bi-weekly deliverable: WORD & PDF format ● Final report: WORD & PDF format ● Presentation slides: PPTX & PDF format
Line Spacing	All typed material should be single-line spaced.
Font Size	Font size of 11-point is required. Wisely use the headings and subheadings in the report.
Type Style	Use Arial for body text.
Headers and Footers	Appropriate footers and headers should be used to enhance clarity and presentation. Ensure that all pages (except cover page) are numbered.
Margin	Top : 0.75 cm Left/right: 1.00 cm Bottom : 0.55 cm
Word / page count	● Bi-weekly deliverable: Not more than 3 pages. ● Final submission - Final report: No more than 10,000 words (or 20 pages) for Chapter 1 - 5. - Presentation slides: Not more than 12 slides
Paper Size	Use A4 paper.

BMIS2113 Information Technology Infrastructure

It is recommended that your assignment be well structured and logically argued. Your deliverables will be evaluated on the basis of content and style. You should make every attempt to use ‘outlining’ features of Word and use headings and sub-headings wherever possible and appropriate.

(1) Report content (Bi-weekly Report)

No	Topic	Description
1	Cover page	In submitting the weekly assignments, you are required to attach your assignments with a cover page shown below, which is available and to be shared by the tutor. Refer to the <i>Appendix A</i> .
2	Body • Chapter 1-5. • A chapter on bi-weekly respectively	This is the main part and the most important part of the deliverables for the submission. This contains all the requirements of the assignment as stated. Arrange them in the same sequence as the assignment sequence. Clearly identify the various sections of the assignment Deliverable: Your analysis and proposal for improvement in table format, in not more than 3 pages, for each bi-weekly deliverable. Indicate the student contributor’s name for the section in-charge on the proposal for improvement.
3	References	You are required to list down any references which you have used. The listing must be in APA Referencing System format.

(2) Report content (Final Report)

No	Topic	Description
1	Cover page	In submitting the final assignment report, you are required to attach your assignments with a cover page shown below, which is available and to be shared by the tutor. Refer to the <i>Appendix A</i> .
2	Plagiarism Statement Form	All work presented for assessment is expected to be the student’s own and original work. The lecturer expects of all students, honest and meticulous acknowledgement of all sources of materials used. Students are required to upload their final report for plagiarism checking. The matching percentage of all assignments submitted should NOT be more than 25%. Any assignments with more than 25% of the percentage matched/overlapped in “Check Plagiarism” are considered Plagiarism. Refer to <i>Appendix B</i> . Turnitin report is to be placed at the last section of this report.
3	AI Usage Disclosure Form	To ensure clarity and consistency in the application of AI tools, the levels of permissible AI tools usage (under the Red–Yellow–Green Framework) for this assignment is: • Yellow (Limited AI): AI tools may be used for specific and clearly defined purposes, such as data analysis, language refinement, or technical support. However, AI tools shall not be used to generate core arguments, critical analysis, or original academic content. Refer to <i>Appendix C</i>. Policies or/and guideline (as of intranet): • TAR UMT Policy for the Use of Artificial Intelligence (AI) • TAR UMT AI Students Guidelines

BMIS2113 Information Technology Infrastructure

4	Table of Content	It should indicate the various headings or subheadings covered in the assignment and page numbers.
5	Introduction (Chapter 1) Essay format	In this section you are required to provide a brief introduction to what will be covered in the rest of the report. E.g. industry or organisation selected, IT infrastructure building blocks involved.
6	Body (Chapter 2 - 5) Essay format	This is the main part and the most important part of the report. This contains all the requirements of the assignment as stated above. Arrange them in the same sequence as the assignment sequence. Clearly identify the various sections of the assignment. 1. Current IT infrastructure analysis • A detailed audit of the existing IT infrastructure building blocks. 2. All the solution options, as of bi-weekly deliverables • A comprehensive description on the potential improvement solutions tailored for <i>each</i> identified IT infrastructure building block.
7	Conclusion	Your proposal must explicitly include the Final Recommendation & Justification. • A definitive statement declaring your chosen final decision. • A supportive justification explaining why this is the most feasible solution for the company moving forward.
8	References	You are required to list down any references which you have used. The listing must be in APA Referencing System format.
9	Group Contract Form	You are required to attach your assignments with the complete Group Contract Form. Refer to Appendix D .
10	Assessment Rubrics	You are required to attach your assignments with the Assessment Rubric form. Refer to Appendix E and Appendix F .
11	Appendixes	All past bi-weekly deliverables.
12	Originality Report (Turnitin report)	Plagiarism checking (< 25%) • Students are required to upload their final report for Turnitin checking. Please note that this is for plagiarism check only, NOT for submission purposes.

(3) Slides for presentation

- Presentation slides: **Not more than 12 slides**
- At the **top left hand corner**, insert the **company's name** as header.
- At the **top right hand corner**, insert the **team number** (e.g.: Team 1).
- At the **bottom left corner**, label the **student contributor's name**,
- At the **bottom right corner**, equipped with a **slide number**.

Assignment Question**Part 1: Bi-weekly Class Deliverables ----- Group (30%) & Individual (40%)**

Students are required to form into small groups **no more than** 4 students. Each group will be assigned a business industry from the list below by the tutor:

1. Technology services
2. Retail
3. Agriculture and plantation management
4. Manufacturing
5. Healthcare
6. Waste management

After an industry has been assigned to a group, no changes are allowed unless with prior approval from the tutor. Students are advised to do more research on the similar industry, to further understand the industry that they have been assigned as thorough understanding of the functions for a business organisation will be useful for the various activities in the assignment..

Week	Tasks / activities	Marks allocated
	1. Briefing to Students 2. Group formation (A) The Company 3. Analyse the company background (e.g.: Company, processes, information, technology used). 4. Provide a brief description on the IT infrastructure implemented.	
1-2	<u>The company</u> The company background & IT infrastructure implemented in detail. (3 pages)	(A) The Company 10 marks (group)
	(B) Detailed analysis on the existing IT infrastructure building block of the company. The case studies provided served as a heads-up. Students are required to research more to define the company context more comprehensively. - Describe the existing implementation of the IT infrastructure building block. - Elaborate the impact from the failing of the infrastructure building block to meet the daily workflow demands. - Discuss the company's internal constraints. - Etc.	
	(C) Proposal to improve the IT infrastructure building block for the company. Each student proposes a comprehensive system IT infrastructure building block solutions to resolve the issues, according to the building blocks specified on bi-weekly basis as below, based on the analysis of the existing implementation. - Explain how the upgrade aligns with the company's constraints, Malaysian market challenges, provides business value, etc.	
3-4	<u>The Data Center Building Block</u> - Deliverables: Your analysis and proposal in table format - Existing, impact, etc (1 page) - Proposal, justification, etc (2 pages)	(B) Detailed analysis 4 x 5 marks = 20 marks
5-6	<u>The Network Building Block</u>	

BMIS2113 Information Technology Infrastructure

	- Delivables: Your analysis and proposal in table format - Existing, impact, etc (1 page) - Proposal, justification, etc (2 pages)	(Group)
7-8	<u>The Storage Building Block</u> - Delivables: Your analysis and proposal in table format - Existing, impact, etc (1 page) - Proposal, justification, etc (2 pages)	(C) Proposal to improve 4 x 10 marks = 40 marks (Individual)
9-10	<u>The Compute Building Block</u> - Delivables: Your analysis and proposal in table format - Existing, impact, etc (1 page) - Proposal, justification, etc (2 pages)	

Part 2: Final Deliverables ----- Group (20%)

You are required to submit a comprehensive, professional final proposal that evaluates an organization's existing IT infrastructure and recommends strategic improvements.

This final document must be a polished compilation of **all bi-weekly deliverables**, revised and enhanced based on previously received feedback. The final documentation must strictly comply with all established presentation, layout, and formatting guidelines.

Part 3: Presentation -----Individual (10%)

This is a group presentation with individual assessment, every member within the group is required to participate during his or her team's group presentation.

The presentation will be held in Weeks 12- 13 during practical classes.

Dress code : Smart casual.

Duration : 15 min presentation and 5 min for Q & A

Slides : State the student contributor's name on the bottom right-hand corner of the slide.

Late : Team member(s) who are late to the presentation will affect their grading.

AI Usage Disclosure Form

Student Name: _____

Programme: _____

Course: _____

Assessment Title: _____

1. AI Tool(s) Used (Check that all that apply)

- ☐ None (I did not use any AI tools for this assignment)
- ☐ ChatGPT (Version: _____)
- ☐ Deepseek
- ☐ Gemini
- ☐ Other: _____

2. Nature of Assistance (Check all that apply)

- ☐ Research: Summarising long articles or finding concepts.
- ☐ Editing: Checking grammar, spelling, or sentence structure.
- ☐ Coding/Math: Debugging code or explaining a formula.
- ☐ Creation: Generating images, data, or draft text.

3. Disclosure Statement

Provide a brief explanation of how AI tools were utilised in completing the task and describe the measures taken to ensure that the final submission reflects your own independent work.

Example:

“I used ChatGPT to structure my initial ideas into an outline. Subsequently, I composed the full paragraphs independently and cross-checked the referenced dates against my textbook to ensure accuracy.”

Your Statement:

4. Verification & Integrity

- ☐ I have reviewed and verified the accuracy of all facts, data, and citations generated with the assistance of AI tools.
- ☐ I have properly acknowledged and cited any AI-generated text, ideas, or content in accordance with my instructor's requirements.
- ☐ I confirm that the reasoning, interpretation, and analysis presented in the final submission are entirely my own.

Content	Does not address all assignment components. Incorrect and unclear description of the assignment deliverables.	Addressed many of the assignment components. Reasonably correct description of the assignment deliverables.	Addressed almost all of the assignment components. Almost comprehensive, relevant and mostly correct description of the assignment deliverables.	Addressed all of the assignment components. Perfectly comprehensive, relevant and correct description of the assignment deliverables.	Mark Awarded	
Mark allocated	Poor (0 - 2 marks)	Average (3 - 5 marks)	Good (6 - 8 marks)	Excellent (9 - 10 marks)	Bi-weekly	Sub-total
Part I: Week 1 - 2						
Part I: Sub-total (10 marks):						
Mark allocated	Poor (0 mark)	Average (1 - 2 marks)	Good (3 - 4 marks)	Excellent (5 marks)	Bi-weekly	Sub-total
Part I: Week 3 - 4						
Part I: Week 5 - 6						
Part I: Week 7 - 8						
Part I: Week 9 - 10						
Part I: Sub-total (20 marks):						
Mark allocated	Poor (0 - 2 marks)	Average (3 - 5 marks)	Good (6 - 8 marks)	Excellent (9 - 10 marks)	Final report	Sub-total
Part II: Analysis	Content consists of generic, surface-level statements with no meaningful application of learned technical concepts.	Content demonstrates a limited, safe, or basic use of course concepts to support the infrastructure discussion.	Clear, strong analysis consistently and correctly applies learned concepts to the various infrastructure building blocks.	Deeply analytical, seamlessly applies learned concepts across all infrastructure blocks, offering unique or forward-thinking insights.		
Part II: Completion and correctness	Fails to address core assignment components. Descriptions of deliverables are entirely incorrect, missing, fragmented or completely unintelligible.	Addresses some or many assignment components, but descriptions of deliverables contain notable omissions, partial details or minor inaccuracies.	Safely addresses almost all assignment components. The description of deliverables is comprehensive, highly relevant and mostly correct.	Masterfully addresses all required assignment components. The description of deliverables is comprehensive, precise, and highly relevant.		
Part II: Sub-total (20 marks):						

Assignment Part II & III - Assessment Rubrics**CLO3: Design the IT infrastructure and IT server architecture options for an organisation. (C4, PLO2)**

Student's Name and ID

1. (Name) _____, (ID) _____

Content	Does not address all assignment components. Incorrect and unclear description of the assignment deliverables.	Addressed many of the assignment components. Reasonably correct description of the assignment deliverables.	Addressed almost all of the assignment components. Almost comprehensive, relevant and mostly correct description of the assignment deliverables.	Addressed all of the assignment components. Part III: Content(Accuracy & Arguments)	Content is highly inaccurate, completely disorganized or misses the core objectives of the proposal entirely. Lacks key project components.	Content is mostly correct but treats topics superficially. The flow is disjointed, and critical technical details or recommendations are weak or missing.	Content is complete, well-organized, and accurate. All key components of the infrastructure proposal are addressed with sound, logical arguments.	Content is exceptionally thorough, perfectly organized, and highly compelling. Arguments are backed by deep insights and flawless technical accuracy.		
Part III: Style (Delivery & Visuals)	Slides are cluttered, hard to read, or contain significant typos. Delivery is completely read from notes/slides with poor pacing, posture, or audible presence.	Slides are plain or copy-heavy with minimal design effort. The presenter relies heavily on reading text word-for-word, displaying low engagement or nervous pacing.	Slides are clean, visually professional, and support the talk. The presenter maintains solid eye contact, speaks clearly at a good pace, and articulates technical terms well.	Slides are professional and highly engaging and visually sleek. The presenter commands the room with dynamic delivery, seamless transitions, and flawless confidence.		
Part III: Sub-total (10 marks):
