

Assignment Specification

1. Introduction

This assignment provides students with the opportunity to apply various project management skills. Students will work in teams of 5 members per group (or any number deemed appropriate) from the same tutorial class. Every member in the team is expected to contribute and participate actively in the entire process of completing the assignment tasks.

2. Learning Outcomes Assessed

CLO	Description	Weightage
CLO2	Assume responsibility to practice communication skills for project management. (A3, PLO5)	20%
CLO3	Behave according to the code of ethics and professional conduct for project management. (A3, PLO11)	80%

3. Assignment Task

A client has awarded a software project to your team. Now your team is required to **write a report** that shall include all the following content.

- Project Background
- Project Team
- Project Scope
- Project schedule
- Quality Plan
- Risk Table, etc

Notes:

- You have to make an assumption about who the client is.
- The software project awarded to you is any one from below (i.e., choose one from the examples given in part 4), or your tutor may assign one to you.

Refer to the "[Appendix](#)" for more details of the assignment tasks. Work as a team to carry out the necessary research to complete this assignment. Additionally, each team member will **take turns acting as** project manager each week to report progress to the tutor. In project management, a project manager's main concern is to complete the project on time, within budget, and to meet the required quality.

4. Examples of Software Development Projects

- Jobs Recruitment Website
- Internship Management System
- Appointment Management System
- Property Management System
- HR Management System
- Expense Reimbursement System
- Self-Checkout System (software development only)
- Student's own choice _____ (note: subject to approval)

5. Deliverables Submission

A representative from each team is required to submit:

- (a) An **ASSIGNMENT REPORT** (Cover Page + Assignment Report + Originality Report) [in PDF format](#).

Name your Assignment Report as:

Programme-Group - Studname1,Studname2,Studname3,Studname4,Studname5 -
REPORT

E.g: RSW3S2-G1 – Jack, James, Jim, John, Johnson – **REPORT**

Format: use 1.5 line spacing, font size: 11(content), font style: Times New Roman and should contain proper headings and sub-headings.

- (b) The team **PRESENTATION SLIDES** with the student name on each slide [in PPTX/Google SLIDES format](#). Name your Presentation Slides as:

Programme-Group - Studname1,Studname2,Studname3,Studname4,Studname5 - SLIDES

E.g: RSW3S2-G1 – Jack, James, Jim, John, Johnson – **SLIDES**

(Note: no need to convert to PDF format)

- (c) The team **ASSIGNMENT RUBRIC** [in Google Sheet format](#). Fill in your project title, programme, group, and student's name. Name your assignment rubrics as:

Programme-Group - Studname1, Studname2, Studname3, Studname4, Studname5 –
RUBRICS.

E.g: RSW3S2-G1 – Jack, James, Jim, John, Johnson – **RUBRIC**

(Note: no need to convert to PDF format)

Note:

- Submit all the above to your respective [Tutor's Google Classroom](#).
- *Originality Report: Checking for the assignment report should be [less than 30%](#).*

6. Submission Deadline

[Week 11, Saturday \(29-Aug-2026\)](#)

Oral presentation: week 12-13

Feedback on Assignment: week 14

7. Late Submission

Refer to TAR UMT's Guideline on Late Submission of Coursework.

8. Academic Integrity and Plagiarism

There must be originality in your work, i.e., your work is not copied from or referred to other teams. You must work with your team member(s) to solve this assignment. Before submitting your assignment, ensure that you have complied with TAR UMT's plagiarism policy. Any cheating, attempt to cheat, plagiarism, collusion, or any other attempt to gain an unfair advantage in assessment will result in the students concerned being penalized. Students found to be dishonest are liable to disciplinary action.

9. AI Usage

Students are allowed to use Artificial Intelligence (AI) tools, and AI should be utilized as a supportive learning tool for tasks such as brainstorming, language refinement, or technical guidance, rather than as a replacement for independent thinking, critical analysis, and problem-solving.

Students should ensure that all submitted work reflects their own understanding and effort. Relying excessively on AI in a way that undermines the demonstration of learning outcomes, knowledge, or skills is strongly discouraged. Unauthorized use of AI tools or improper use of AI-generated Content is prohibited. Examples include copy-and-pasting AI-generated content as original work, which may be considered academic misconduct and could lead to disciplinary action in accordance with university regulations.

Appendix: Guidelines for preparing the SPM Assignment Report.

1. Project Background

- a) Briefly describe the **project development team** (the project development team is your group) (*hints: give your group a name, years of experience in the IT industry, group expertise, etc*). Make sure 1(a) and 2(a) are different)
- b) Briefly describe the project **client**, the client's **nature of business**, and the **reasons** the client wants to undertake the project.
- c) Estimate the **project costs** (This may include hardware, software, manpower, etc. The entire project development duration must be between 3 and 5 months.
- d) In one sentence, state the **objective** of this project (must conform to the SMART criteria)

2. Project Team Structure, Stakeholders, and Communication Plan

- a) Illustrate your **project team structure** graphically. Provide a list of team members' names, job positions, and roles.

b) Stakeholders Register

No	Stakeholder (Individual or Group)	Job position (individual only)	Role (client's side only)	Expectation
1				
..				
4-6				

Note: - must include the project team and client (e.g., project sponsor, potential users of the system, etc)
- You only need to fill in the role column, if the stakeholder is from the client side.

c) Communication plan

No	Name of the communication (Method)	Purpose	Frequency	Audience	Owner
1					
..					
4-6					

Note: You can use your own format for this part.

3. Project Scope, Exclusions, and Software Process Model

- a) Illustrate graphically the **scope of the system to be developed** (show 3 levels: system, modules, and functions). Briefly describe the functionalities of each module.
- b) **Exclusions:** List 2 items/services/jobs and/or hardware/software that will not be provided or covered in this project.
- c) **Software Process Model:** Select a suitable software process model for this project. Explain two

advantages and two disadvantages of the selected model.

4. Project Schedule and Assumptions

Use Microsoft Project to create a schedule for the project timeline. List two assumptions you made during this process.

5. Quality Plan

Identify and **justify** one important software quality attribute for the system. For the quality attribute, specify the **quality assessment process**.

6. Risk Table

Identify one potential risk in your project. Briefly describe the **risk** and estimate its **probability and impact**. Lastly, your **risk mitigation, monitoring, and management** plans.

7. Ethics and professional conduct for project management

- a) Based on the Stakeholder Register, identify two **strategies to engage key stakeholders** (specifically, the most influential/powerful stakeholder *and* potential end-users of the system)
- b) Referring to the selected software process model, explain why it is also important to **disclose the disadvantages** of the chosen model to relevant stakeholders.
- c) If your project is significantly behind schedule, propose two **corrective actions** to bring the project back on track. For each action, evaluate one advantage and one disadvantage.

Refer to [Assignment Rubrics](#) for details on the assessment criteria and marks allocation
